

Ultra-light softshell jacket for extreme weather conditions

Functional material with TPU-membrane
Wind- and waterproof (10,000 mm water column)
Breathable and permeable to vapour (5,000 g/m²/24h)
Taped seams, waterproof zips
2-way zip
2 zipped side pockets
Multiply adjustable hood
Ergonomically extended back
JN1097: lightly waisted

Fabric: Outer fabric (130 g/m²): 100%

polyester

Country of origin: Volksrepublik China

Customs tariff number: 61023090

Softshell

Softshell with TPU membrane consists of three layers. Due to the microporous TPU membrane as middle layer the material is water-proof, wind-proof and breathable at the same time.

Breathable-Permeable to water vapour

Functional textiles must have the ability to transport moisture from the skin to the fabric surface as fast as possible. Permeability shows how much steam in grams can evaporate on a surface of 1 m2 within 24 hours. The higher this figure, the more breathable the textile is.

Water column from 1.500 mm

The ability to withstand water pressure without moisture penetrating into the material is given by the water column (mm). The minimum standard is a water column of 1,500 mm.

Taped seams

To avoid moisture penetrating into the fabric, seams and stitches can get taped. Taped seams are 100 % water-proof.
