**OEKO-TEX® Stoff**

The fabric of this article has been tested for harmful substances and certified acc. to STANDARD 100 by OEKO-TEX®

**Softshell**

Softshell with TPU membrane consists of three layers. Due to the microporous TPU membrane as middle layer the material is water-proof, wind-proof and breathable at the same time.

**Breathable-Permeable to water vapour**

Functional textiles must have the ability to transport moisture from the skin to the fabric surface as fast as possible. Permeability shows how much steam in grams can evaporate on a surface of 1 m<sup>2</sup> within 24 hours. The higher this figure, the more breathable the textile is.

**Water column from 1.500 mm**

The ability to withstand water pressure without moisture penetrating into the material is given by the water column (mm). The minimum standard is a water column of 1,500 mm.
