

**Ultra-light softshell jacket for extreme weather conditions**

Functional material with TPU-membrane  
 Wind- and waterproof (10,000 mm water column)  
 Breathable and permeable to vapour (5,000 g/m<sup>2</sup>/24h)  
 Taped seams, waterproof zips  
 2-way zip  
 2 zipped side pockets  
 Multiply adjustable hood  
 Ergonomically extended back  
 JN1097: lightly waisted

<b>Fabric:</b>	Outer fabric (130 g/m <sup>2</sup> ): 100% polyester
<b>Country of origin:</b>	Volksrepublik China
<b>Customs tariff number:</b>	61023090

**OEKO-TEX® Standard 100**

OEKO-Tex® CONFIDENCE IN TEXTILES STANDARD 100 15.0.70467 HOHENSTEIN HTTI Tested for harmful substances. [www.oeko-tex.com/standard100](http://www.oeko-tex.com/standard100)

**Softshell**

Softshell with TPU membrane consists of three layers. Due to the microporous TPU membrane as middle layer the material is water-proof, wind-proof and breathable at the same time.

**Breathable-Permeable to water vapour**

Functional textiles must have the ability to transport moisture from the skin to the fabric surface as fast as possible. Permeability shows how much steam in grams can evaporate on a surface of 1 m<sup>2</sup> within 24 hours. The higher this figure, the more breathable the textile is.

**Water column from 1.500 mm**

The ability to withstand water pressure without moisture penetrating into the material is given by the water column (mm). The minimum standard is a water column of 1,500 mm.

**Taped seams**

To avoid moisture penetrating into the fabric, seams and stitches can get taped. Taped seams are 100 % water-proof.
