**OEKO-TEX® Standard 100**

OEKO-TEX® CONFIDENCE IN TEXTILES STANDARD 100 15.0.70467 HOHENSTEIN HTTI Tested for harmful substances. [www.oeko-tex.com/standard100](http://www.oeko-tex.com/standard100)

**sorona®AURA**

sorona®AURA fibers consist of 37% vegetable components, obtained from renewable raw materials. Garments with sorona® Aura offer an eco-friendly alternative with outstanding breathability, lightweight comfort and efficient heat retention. sorona®AURA offers the perfect mix of sustainability and performance.

**Breathable-Permeable to water vapour**

Functional textiles must have the ability to transport moisture from the skin to the fabric surface as fast as possible. Permeability shows how much steam in grams can evaporate on a surface of 1 m<sup>2</sup> within 24 hours. The higher this figure, the more breathable the textile is.

**Water column from 1.500 mm**

The ability to withstand water pressure without moisture penetrating into the material is given by the water column (mm). The minimum standard is a water column of 1,500 mm.

**Taped seams**

To avoid moisture penetrating into the fabric, seams and stitches can get taped. Taped seams are 100 % water-proof.
